Attn: Hon. Peter Parsons, Supervisor

RE: Reduced Monitoring - Lead and Copper
Oakridge Water System
PWS ID#: NY5918395
Lewisboro (T)

Dear Mr. Parsons:

This Department is in receipt of consecutive satisfactory annual Lead and Copper monitoring results, collected between January 01, 2018 and September 30, 2020 for the above referenced Public Water Supply (PWS). Based on these results, Oakridge PWS has been placed on an every three (3) years Lead and Copper monitoring schedule effective January 01, 2021, in accordance with Part 5, Subpart 5-1, Section 5-1.42 of the New York State Sanitary Code.

In light of the above, Oakridge PWS (population 892) shall conduct Lead and Copper monitoring at a reduced frequency of:

- **Ten (10) samples, collected every three (3) years between June 1 and September 30 each year starting with a 2021 monitoring period.**

The water samples for Lead and Copper monitoring must be collected from the reduced sampling sites indicated on the PWS' approved Comprehensive Monitoring Plan. Any deviation from the approved monitoring plan must receive approval from this Department before sampling is performed.

Additionally, these sample results must be submitted by the Designated Operator in Responsible Charge to the Department with a report indicating the 90th percentile levels for lead and copper for the specified monitoring period, by the 10th calendar day of October of the sampling year.

Please see the enclosed Sample Schedule highlighting this change in monitoring frequency.

Should you have any questions, please contact Chika Amasiani, Assistant Engineer at (914) 864-7338 or the undersigned at (914) 864-7348.

Very truly yours,

Zaw Thein, P.E.
Associate Engineer
Bureau of Environmental Quality
